PRODUCT DATA

DRAINAGE MAT

Drainage media has been used behind Master Wall® Systems for many years. The drainage media can vary from a very thin cross section material, a thicker version designed to prevent capillary action to a true ventilated wall cavity. The designs will vary and Master Wall® is available to help coordinate detailing as needed.

FEATURES & BENEFITS

- Provides a defined drainage plane
- Helps prevent capillary action
- Adds a break for thermal or moisture drive
- Addresses code compliance requirements in moist environments

GENERAL APPLICATION INSTRUCTIONS

Advanced Building Products Inc. Mortairvent: Rainscreen Mat with Backer Fabric, 6 mm & 10 mm, Benjamin Obdyke Home Slicker: Rainscreen Mat, Home Slicker Plus Typar: Rainscreen Mat with water barrier, Home Slicker Stone & Stucco: Rainscreen Mat with mortar fabric., Keene Building Products Driwall Rainscreen 075: Wide Spaced Rainscreen Mat, Driwall Rainscreen 075-1: Wide Spaced Rainscreen Mat with mortar fabric Maxxon® VenTek™. Install in strict accordance with manufacturer's recommendations. Attach drainage spacer at framing locations only.

Colsella Dörken Delta®-Dry or Delta®-Dry Plus High Performance Rainscreen System or Keene® Building Products Driwall Rainscreen 020-1. Install in strict accordance with manufacturer's recommendations. Attach drainage spacer at framing locations only.

Where a defined drainage space is provided over the weather resistive barrier under lath and cement plaster, the ground dimension of lathing accessories with solid attachment flanges installed behind the water resistive barrier and defined drainage space to facilitate drainage such as weep screeds, designated drainage screeds, expansion joints and drainage flashings, shall accommodate the defined drainage space dimension and specified cement plaster thickness. Install components and flashings as needed to facilitate drainage.

Typical Systems
