Master Wall Inc.® disclaims design, warranty or construction intent or responsibility. Bold = Master Wall® Product.

Trim Method Notes
- If trim is planned it’s usually best to avoid running the control joints through them.
- Evaluate floor line conditions and place either a control or expansion joint.
- If large foam trims are used, plan on adding an expansion joint in the trim if the control joint continues behind it.
- Use Striplath reinforcement at corners.

Master Wall Inc.® disclaims design, warranty or construction intent or responsibility. **Bold = Master Wall® Product.**

**Classic Method Notes**
- The classic method uses the window and door openings as part of the control joint process.
- Evaluate floor line conditions and place either a control or expansion joint if needed, otherwise follow the general guidelines.
- Generally foam trims aren’t used with this aesthetic condition.
- Do not use butterfly lath reinforcement at corners.

Inside and Outside Corners
Install corner lath at inside corners and corner bead at outside corners over lath. Attach through lath into framing at 6 inches (152 mm) on center with appropriate fasteners.

Diagonal Reinforcement
Apply Striplath, minimum 4” x 12” (102 mm x 305 mm), in type and weights of selected lath at casing bead corners.

Unpainted Masonry or Concrete. Specify Masonry joints struck flush.

**Notes:**
Control joints are required and should be located by the designer in the Cemplaster Fiberstucco at the following locations on the construction documents:
- At masonry control joints
- In accordance with masonry guidelines
- Provide additional control joints where special conditions exist.
