PRODUCT DATA

CIFS® WOOD GRAIN GLAZE

CIFS® WOOD GRAIN SPECIALTY FINISH

CIFS® Wood Grain Glaze used artistically over Wood Grain Tex specialty finish creating the look of wood with the durability of an acrylic finish and is formulated with DuroTone pigments for excellent color retention.

FEATURES & BENEFITS

- Glazing and accent coating for the CIFS® Wood Grain application procedure
- Integrally colored
- Standard and custom colors available

Application Temperature: 40°-110°F (5°-43°C)

Working Time: 1/2 hour

Dry Time: 12 hours at room temperature, working and drying time will vary with temperature and humidity.

JOB CONDITIONS

Air and substrate temperature for application must be 40°F (5°C) or higher and must remain 40°F (5°C) or higher for a minimum of 24 hours. Provide temporary protection to protect the wall system from damage until permanent flashings, caps and sealants are installed. Store mate-rials within prescribed temperature limits and out of direct sun-light. High temperatures will reduce working times, Low temperatures and/or high humidity and pigment loading will extend working, set and dry times.

Store materials within prescribed temperature limits and out of direct sunlight. Working and drying times are based upon normal room temperature conditions and will vary with temperature and humidity.

PREPARATION

The Wood Grain Tex Finish must be clean, dry, and ready to receive the acrylic coating.

Equipment Needed - Brush, 4”-6” (102-154 mm) Foam Roller, Spray bottle with water, Wood Grain Tool (Available from Master Wall®), Wood Grain Sealer.

Mixing - Thoroughly stir Wood Grain Glaze into a homogenous consistency. Small amounts of clean, potable water may be added to obtain a workable consistency. Do not over mix. Do not exceed 24 ounces (0.7 L) of water per pail. Do not add accelerators or retarders to Wood Grain Glaze.

Coverage per pail (sf/sm)*

1000-1200 sf/pail (93-112 sm)

**All coverage is approximate and depend upon substrate, details and individual application*

Packaging/Shelf Life/Storage

Packaging: 5 gallon (19L) pail

Shelf Life: 2 years

Storage: Protect from extreme heat - 90°F (32°C), freezing and direct sunlight.

Hazard: This chemical is not considered hazardous according to the OSHA Hazard Communication Standard 2012 (29 CFR 1910.1200).

VOC: Less than 50 g/L.

WOOD GRAIN GLAZE

PRODUCT DATA

APPLICATION PROCEDURE

Wood Grain Glaze is applied by brush or a moist foam roller. Using a paint brush for latex paints, brush Wood Grain Glaze into the grooves of the finish. Using a moist foam roller, roll a thin amount of Wood Grain Glaze onto the finish surface and keep a wet edge. Using a spray bottle, wet the surface of the Wood Grain Glaze to thin and keep from tacking too quickly.

Add grain to the surface using the Wood Grain Tool along the length of the grooved finish, rocking the tool to create the desired pattern. Once dry to the touch, lightly sand the surface if needed using 100-grit sandpaper to remove any high spots or heavy stain areas.

Using a sponge or roam roller, cover the entire surface with CIFS® Wood Grain Sealer.

CAUTIONS AND LIMITATIONS

Do not use Wood Grain Glaze as a finish directly over any Master Wall base coat.

CLEAN UP

Tools and equipment can be cleaned with soapy water when Wood Grain Glaze is wet.
